

Sanlam Global High Quality Fund achieves 4 Morningstar stars

Morningstar have awarded the Sanlam Global High Quality Fund 4 stars in its monthly Morningstar Ratings rebalance.

The Morningstar Rating for funds, commonly called the star rating, is a measure of a fund's risk-adjusted return, relative to similar funds. Funds are rated from one to five stars, with the best performers receiving five stars and the worst performers receiving a single star.

This means the **Sanlam Global High Quality Fund** is among the top 32.5% of its peers over a period of 10 years.

Pieter Fourie, fund manager, commented: "At a time when almost half of global equity returns are being driven by only 7 standout stocks (dubbed the "magnificent 7") it's never been more prudent to diversify with a true long-term, disciplined strategy of high-quality companies. I'm pleased that our approach has been recognised for precisely this philosophy over the years. ",

Past performance is not a guide to future performance.

Fund risks

The Fund may invest in companies based in emerging markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty. The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates.

Important information
