

Sanlam Investments

We draw on deep-rooted investment expertise to offer a range of high conviction active strategies encompassing traditional and alternative asset classes. Firmly entrenched, our approach is distinguished by its unwavering focus on meeting client needs.

As part of the Sanlam Group, we have the backing of a business that has a 100 year heritage in financial services, giving us the confidence to take a long-term view.

Experience matters

As an active investment specialist, we know that experience informs how we navigate complex and evolving markets. Our Fund Managers bring decades of experience through all market conditions. Collectively, they bring our high conviction approach sharply into focus with the flexibility to do what they do best - identifying new investment ideas and opportunities.

Boutique ethos

Our investment teams are autonomous - there is no central house view. This gives them the freedom to look for distinct investment ideas in their area of expertise. With no collective view and no rigid hierarchy, our specialist investment teams follow their own distinctive approach across their respective asset classes.

Client-first thinking

We are committed to helping our clients find active, high conviction sources of return within a sustainable, risk-controlled framework. We value our client-first approach - it lies at the heart of all we do. Our differentiated reward structure, where fund managers have significant long-term equity stakes in their respective business areas, ensures we remain fully aligned and responsive to our investors' evolving needs.
