

How to invest

Our Sanlam funds can be accessed by investing directly or through investment platforms, depending on your preferred investment route.

Before proceeding, investors should review the **SVS Unit Trust Prospectus**, together with each fund KIID, which are available in our **Literature section**. These documents explain the different types of specific risks associated with the investment portfolio of each of our products. We suggest that if you have any doubts about the suitability of an investment, you should consult a professional adviser.

To invest with us directly you will need to open an account by completing an **application form**, or you can also invest in our funds via a number of platforms.
