

IFSL Sanlam Conservative Fund

June 2021

Phil Smeaton
Fund Manager

Phil is the Chief Investment Officer for Sanlam Private Wealth UK. He graduated with a first-class honours degree in Mathematics from Oxford University and has extensive investment experience. He has a track record running a market neutral hedge fund as well as global long only funds. His career began in 2000 as an analyst on the European Equity team at Tokyo Mitsubishi Asset Management. In 2006 he joined the Global Equity team at Batterymarch. Phil has been a CFA Charterholder since 2003.

Objective

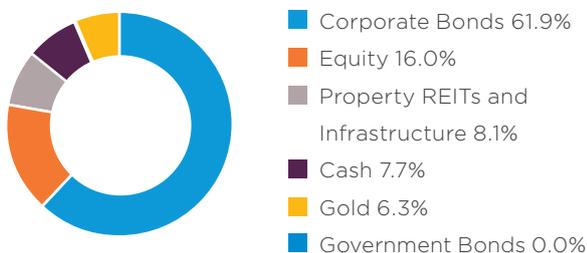

The aim of the Fund is to grow the value of your investment over a period of at least 5 years. This growth is expected to come from a combination of profit on investments and income paid out of investments, such as interest and dividends.

Asset class exposure

Country exposure**

**excludes cash exposure

The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates.

The Fund may invest in derivatives for the purposes of efficient portfolio management (including hedging) and for meeting the investment objectives of the fund. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.

Part of the fund is invested in fixed income. The government or company issuer of a bond might not be able to repay either the interest or the original loan amount and therefore default on the debt. This would affect the credit rating of the bond and, in turn, the value of the fund. Investment in bonds and other debt instruments (including related derivatives) is subject to interest rate risk. If long-term interest rates rise, the value of your shares is likely to fall.

The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Authorised Corporate Director, the Investment Manager or at www.ifslfunds.com.

Commentary

Developed economies are powering ahead as vaccine programmes are rolled out, Covid restrictions are relaxing and businesses can increasingly operate as normal. Equity valuations are expensive but over long periods of time earnings growth is the key driver of nominal returns. Rising prices and the business cycle should support profits in the medium term. Our focus is on businesses with a clear pathway to growth, reasonable valuations, and competitive advantages with the ability to pass on inflationary price increases. Portfolios are positioned for structurally higher but modest inflation with weight allocated to equities, selected property able to generate real and growing yields, infrastructure where cash flows are directly linked to actual inflation, and gold, which is a claim on the pot of real wealth.

Overview

The Fund's equity exposure will be up to 35%. Between 40% and 100% of the Fund will be exposed to fixed income and other debt securities (investment grade and below investment grade). The Fund is also permitted to be exposed up to 30% in cash and deposits, structured products, structured notes, currencies, money market instruments, loan notes, property and commodities. The Fund will invest in the above asset classes directly and through other collective investment schemes (a mixture of third-party funds and other funds managed or operated by the ACD or the Investment Manager), closed-end

funds, exchange-traded funds ("Collective Investment Vehicles"). Through its investments in Collective Investment Vehicles, the fund may have exposure to other transferable securities than those listed above. These Collective Investment Vehicles could also use derivatives to varying degrees. The investments will span a global range of developed, emerging and frontier markets with no more than 20% being invested in emerging or frontier markets. The Fund may use derivative transactions for the purposes of efficient portfolio management (including hedging) and for meeting the investment objectives of the Fund.
