

Sanlam Multi-Strategy Fund

May 2021 | Factsheet

Overview

The fund combines thematic and systematic investment strategies aimed at generating long-term positive returns. The broad asset class exposure ranges from stock indices and government bonds to real assets, equity derivatives and high yield corporate bonds. The team employs stringent risk analysis and stop loss positions to provide downside protection.

Performance – past performance is not a guide to future performance

Class B returns are used to illustrate the fund's longest track record and has no fixed management fee. It requires a separate agreement with Sanlam Investments and is not available to retail clients. Class A is available to retail clients with a 0.75% p.a. management fee, which would result in lower performance than shown. Please see table below for the effect of these charges on performance. **Please see the table overleaf for all available share classes and total fees, or contact us for details.**

*Distribution yield is the amount received by an investor, and is the sum of distributions paid over the past 12 months, based on the frequency and divided by the last price. The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates. The fund can invest in derivatives. Derivatives are used to protect against fluctuations in currencies, credit risk and interests rates or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The Fund's expenses are charged to capital. This has the effect of increasing dividends while constraining capital appreciation. Part of the fund is invested in bonds. The government or company issuer of a bond might not be able to repay either the interest or the original loan amount and therefore default on the debt. This would affect the credit rating of the bond and, in turn, the value of the fund. Investment in bonds and other debt instruments (including related derivatives) is subject to interest rate risk. If long-term interest rates rise, the value of your shares is likely to fall. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Yield is calculated on historic dividend income from the preceding 12 months. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangements. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Manager, the Investment Manager or at www.sanlam.ie ABO621(319)0921UK&SAInst

Monthly commentary

Activity – Our main activity was the reinvestment of proceeds from maturing bonds into a number of existing holdings. We also added selectively to infrastructure, renewables and specialist property throughout the month. Following our systematic process, we took advantage of lower market volatilities and reset a number equity options.

Transparency – At month end our net equity exposure was 21% and our bond duration was 2.9 years. We have exposure to five markets in the equity momentum strategy and remain active in eight other areas: Synthetic equity options, Global Infrastructure, Renewables, Property, corporate bonds (short dated), government bonds, alternatives and opportunistic. We hold equity index options as upside and downside hedges.

Positive contributors

Synthetic Equity	+0.24%
Infrastructure	+0.15%
Global Equity Momentum	+0.14%

Negative contributors

Hedge Strategy	-0.10%
----------------	--------

Corporate Highlights – Our real assets businesses announced 6 new acquisitions, 1 divestment, and 3 equity placings over the month. We had 2 group investor meetings following results and 5 one-to-one meetings with management teams. Quarterly updates highlighted continued robust and stable performance, and progress on implementing further ESG initiatives. During the month our European residential property company announced a bid for one of its largest peers in Germany. The proposed deal, worth in excess of €18bn, would create Europe's largest residential real estate business and has been recommended by both management teams. If approved, the transaction would bring greater scope to expand the modernisation pipeline of the combined property portfolio, and consequently drive rental growth and capital values. It provides a good example of our businesses identifying opportunities to create value through sustainability.

Outlook – Market participants continue to paw over every economic data release in the hope of understanding where we are in the re-opening process and more importantly, where we are heading. Suffice to say that it is an incredibly noisy period for investors and short-term volatility is the most certain outcome. Within the fund we continue to focus on short duration bonds that will roll forward at higher rates as our bonds mature and real assets investments centred around our "Pillars of a functioning economy" theme. In equity markets we follow our dynamic allocation process that has navigated previous turbulent markets periods very well.

Sanlam Investments, Monument Place, 24 Monument Street, London, EC3R 8AJ
T +44 (0) 20 3116 4000

Issued and approved by Sanlam Investments which is authorised and regulated by the Financial Conduct Authority. Sanlam Investments is the trading name for our two Financial Conduct Authority (FCA) regulated entities: Sanlam Investments UK Limited (FRN 459237), having its registered office at 24 Monument Street, London, EC3R 8AJ and Sanlam Private Investments (UK) Ltd (FRN 122588) having its registered office at Monument Place, 24 Monument Street, London, EC3R 8AJ. The Fund is a sub-fund of the Sanlam Universal Funds plc, a company incorporated with limited liability as an open-ended umbrella investment company with variable capital and segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank. The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002. Sanlam Asset Management is a registered business name of Sanlam Asset Management (Ireland) Limited. Sanlam Asset Management has appointed Sanlam Investments UK Ltd as Investment Manager to this fund. This document is provided to give an indication of the investment and does not constitute an offer/invitation to sell or buy any securities in any fund managed by us nor a solicitation to purchase securities in any company or investment product. It does not form part of any contract for the sale or purchase of any investment. The information contained in this document is for guidance only and does not constitute financial advice. The fund price is calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income and expense accruals. Trail commission and incentives may be paid and are for the account of the manager. Performance figures quoted are from Sanlam Investments and are shown net of fees. Performance figures for periods longer than 12 months are annualized. NAV to NAV figures are used. Calculations are based on a lump sum investment. Please note that all Sanlam Investments Funds carry some degree of risks which may have an adverse effect on the future value of your investment. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Universal Funds plc prospectus, the Fund supplement and the KIID. All these documents explain different types of specific risks associated with the investment portfolio of each of our products and are available free of charge from the Manager or at www.sanlam.ie. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision as not all investments are suitable for all investors.
