

# Sanlam Short Dated Corporate Bond Fund

May 2021 | Factsheet

## Overview

The Sanlam Short-Dated Corporate Bond Fund seeks to deliver income with low volatility. The Fund will invest the majority of its NAV in sterling, dollar and euro short-dated investment grade corporate bonds with maturities of no more than six years. Non-GBP bonds are fully hedged back to GBP. The investment team seek to be imaginative in identifying attractive corporate non-financial and financial investment opportunities, thereby creating a diversified and balanced Fund. The Fund's short duration approach means that it offers some shelter from the interest rate sensitivity that is embedded in longer duration assets.

The Fund invests in short-dated bonds. Investment in bonds and other debt instruments is subject to interest rate risk and credit ratings. The government or company issuer of a bond might not be able to repay either the interest or the original loan amount and therefore default on the debt. This would affect the credit rating of the bond and, in turn, the value of the Fund. If long-term interest rates rise, the value of your shares is likely to fall. Exchange rate changes may cause the value of investments to go down as well as up.

The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Authorised Corporate Director, the Investment Manager or at [www.sanlam.co.uk](http://www.sanlam.co.uk).
