

# SVS Sanlam UK Equity Growth Fund

August 2021 | Factsheet

## Overview

The UK Equity Growth Fund is a long-only, actively managed UK equity fund. Stylistically, the Fund has a clear growth bias and as a result it will tend to perform best when equity markets are strong and growth styles are outperforming value-oriented ones. The investment approach is high conviction with the managers targeting high levels of active share; the managers have the scope to zero weight industries and sectors that they don't like. The Fund's managers, Mark Boucher and Mark Swain, are seasoned investment professionals, having worked in active UK equity management (both long and short) for many decades.

## Performance – Past performance is not a guide to future performance

Performance is shown for the longest running share class, the A GBP Income, as of January 2013. Please see the table overleaf for all available share classes and total fees, or contact us for details.

The Fund primarily invests in company shares listed on stock exchanges in the United Kingdom and will therefore have greater exposure to the market, political and economic risks in the UK. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Authorised Corporate Director, the Investment Manager or at [www.sanlam.co.uk](http://www.sanlam.co.uk).
