

SVS Sanlam North American Equity Fund

April 2022 | Factsheet

Overview

The SVS North American Equity Fund offers core US equity exposure via an actively-managed portfolio of US and North American equities. The co-fund managers, Tim Day and Chris Ford, seek to build exposure to companies offering attractive rates of revenue and earnings growth but which are trading at a discount to their intrinsic value. The Fund is managed in a high conviction manner (typically around 40 holdings) and the managers have the scope to zero weight sectors that they do not like. Tim and Chris have a background in thematic investment management, having previously worked at Pictet, and also manage the Sanlam Artificial Intelligence Fund.

The Manager has selected the MSCI North America Index as a comparator benchmark as the Manager believes it best reflects the asset allocation of the Trust.

The Fund invests mainly in North America, movements in exchange rates may result in frequent rises and falls in the Fund's share price. Exchange rate changes may cause the value of investments to go down as well as up. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Authorised Corporate Director, the Investment Manager or at www.sanlam.co.uk.
