

Sanlam FOUR Multi-Strategy Fund

December 2018 | Factsheet

Overview

The fund combines thematic and systematic investment strategies aimed at generating long-term positive returns. The broad asset class exposure ranges from stock indices and government bonds to real assets, equity derivatives and high yield corporate bonds. The team employs stringent risk analysis and stop loss positions to provide downside protection.

Performance – past performance is not a guide to future performance

Class B returns are used to illustrate the fund's longest track record and has no fixed management fee. It requires a separate agreement with Sanlam FOUR and is not available to retail clients. Class A is available to retail clients with a 0.75% p.a. management fee, which would result in lower performance than shown. Please see table below for the effect of these charges on performance. **Please see the table overleaf for all available share classes and total fees, or contact us for details.**

B USD Accumulation	1.3	9.6	6.6	1.9	-1.6

The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates. The fund can invest in derivatives. Derivatives are used to protect against fluctuations in currencies, credit risk and interest rates or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The Fund's expenses are charged to capital. This has the effect of increasing dividends while constraining capital appreciation. Part of the fund is invested in bonds. The government or company issuer of a bond might not be able to repay either the interest or the original loan amount and therefore default on the debt. This would affect the credit rating of the bond and, in turn, the value of the fund. Investment in bonds and other debt instruments (including related derivatives) is subject to interest rate risk. If long-term interest rates rise, the value of your shares is likely to fall. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Yield is gross and is calculated on historic dividend income from the preceding 12 months. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangements. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Manager, the Investment Manager or at www.sanlam.ie. JRO119(02)0419UK&SA Inst

Monthly commentary

We have exposure to one equity market in the growth momentum strategy. Elsewhere we are now active in nine areas; synthetic equity options, global infrastructure, renewables, property, active alpha, corporate bonds (short dated), government bonds, alternatives and opportunistic. We continue to hold equity index put options as downside hedges. The market rally at the end of November continued for only a few days into December before it gave way to renewed downward pressure. Although there were no new catalysts for the weakness, the S&P 500 index fell over 15% during the month before recovering to end down just under 9%, its worst December since 1931. Elsewhere wasn't much better; the Nikkei 225 index also fell by 15% at its worst point while other global markets lost between 5% and 8%. Government bonds were the main beneficiary of stressed equity markets with yields tightening across the board.

The fund saw negative contributions from synthetic equity, property, midcap alpha, renewable energy, other alternatives, investment grade debt and infrastructure. High yield bonds and hedge positions were positive contributors over the month. As we move into 2019, uncertainty on the geopolitical front and normalising interest rates are likely to continue to weigh on equity markets that have enjoyed an extended cycle. The path of US interest rates will play a key role in the performance of equity markets, while US trade policies (disputes, negotiations and agreements) will highlight that uncertainty can offer the prospect of both positive and negative outcomes. The Brexit clock is ticking down and will undoubtedly impact sterling and the direction of large-cap UK stocks. Bond markets will continue to see divergence across countries and credit quality, but the real question is whether interest rate normalisation will become interest rate tightening. With all of this in mind, we continue to position the portfolio with the profile of a diversified convertible and favour option-based equity exposure (rather than pure directional investments) alongside income producing real assets and short duration bonds.

Issued and approved by Sanlam Investments. Sanlam Investments is a trading name for our two Financial Conduct Authority (FCA) regulated entities: Sanlam FOUR Investments UK Limited (FRN 459237), having its registered office at 1 Ely Place, London EC1N 6RY and Sanlam Private Investments (UK) Ltd (FRN 122588) having its registered office at 16 South Park, Sevenoaks, Kent, TN13 1AN. The Fund is a sub-fund of the Sanlam Universal Funds plc, a company incorporated with limited liability as an open-ended umbrella investment company with variable capital and segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank. The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002. Sanlam Asset Management is a registered business name of Sanlam Asset Management (Ireland) Limited. Sanlam Asset Management has appointed Sanlam FOUR Investments UK Ltd as Investment Manager to this fund. This document is provided to give an indication of the investment and does not constitute an offer/invitation to sell or buy any securities in any fund managed by us nor a solicitation to purchase securities in any company or investment product. It does not form part of any contract for the sale or purchase of any investment. The information contained in this document is for guidance only and does not constitute financial advice. The fund price is calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income and expense accruals. Trail commission and incentives may be paid and are for the account of the manager. Performance figures quoted are from Sanlam FOUR and are shown net of fees. Performance figures for periods longer than 12 months are annualized. NAV to NAV figures are used. Calculations are based on a lump sum investment. Please note that all Sanlam FOUR Funds carry some degree of risks which may have an adverse effect on the future value of your investment. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Universal Funds plc prospectus, the Fund supplement and the KIID. All these documents explain different types of specific risks associated with the investment portfolio of each of our products and are available free of charge from the Manager or at www.sanlam.ie. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision as not all investments are suitable for all investors.
