

Sanlam Active UK Fund

June 2019 | Factsheet

Overview

A concentrated portfolio focusing on UK companies with strong structural growth opportunities and attractive cash flow. The fund adopts a bottom-up approach with a value bias aimed at providing capital growth over the long-term. The team employs an active, conviction-driven management style. Key to the fund is its focus on identifying growing companies, with competitive franchises and strong cash generation.

* Portfolio yield is calculated by adding the net dividend amounts for all dividend types that have gone 'ex' over the past 12 months based on the dividend frequency. This total excludes taxes, any related dividend fees or tax related credits

** Distribution yield is the amount received by an investor, and is the sum of distributions paid over the past 12 months, based on the frequency and divided by the last price

The Fund invests geographically in a narrow range, there is an increased risk of volatility which may result in frequent rises and falls in the Fund's share price. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangements. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Manager or Investment Manager at www.sanlam.ie SAH0719(79)1019UK&SAInst

Monthly commentary

UK equities rallied in June as global equity markets recovered from the correction in May. The US provided the lead, with a dovish Fed meeting providing the confirmation investors needed that monetary policy is now likely to become looser. Perhaps the clearest barometer of the changed sentiment is seen by the strong out-performance of the mining sector in the month, with precious metals in particular gaining from the prospect of lower real interest rates. With this return to a "risk-on" sentiment, other sectors out-performing include industrials and technology whilst consumer staples was the only notable laggard.

The fund lagged the overall market, with stock selection being negatively impacted by a number of issues. The revived possibility of a "no-deal" Brexit spooked investors in domestic stocks such as Lloyds Bank, OneSavings Bank, Great Portland Estates and Howden Joinery, while stock specific factors weighed on IQE (earnings downgrade on Huawei impact) and Rolls Royce (negative Paris air-show commentary). Positive contributions from continuing strength in Sage and Rio Tinto, and tentative recoveries in Wood Group and Prudential, were insufficient to make up the lost relative ground.

This was an active month which also saw a significant inflow of new money into the fund. We continued to build positions in recent new holdings, most notably AstraZeneca, but also Rolls Royce, Intercontinental Hotels and Taylor Wimpey, as well as topping up laggards such as Lloyds Banking, Tui and XP Power. In contrast, we sold out of ITV (competitive risks), Kenmare and Hipgnosis Songs (both illiquid small caps). In the near term fluctuating sentiment on Brexit and global trade wars will continue to be a source of volatility. Notwithstanding the numerous issues currently weighing on investor sentiment, however, the fact is that underlying economic momentum in the UK is surprisingly resilient. Given the already gloomy market sentiment towards domestic stocks only a "no deal" Brexit remains as a possible negative surprise shock.
