

# Sanlam GBP Credit Fund

Q2 2020 | Quarterly newsletter

## Market recap

Asset prices rallied significantly during the quarter as investors' confidence in the markets was boosted by the Fed's, ECB's and Bank of England's support, which in places included High Yield and ETFs as well as Investment Grade credit.

With these QE actions providing a very strong positive technical factor, we would note that the upcoming earnings season may act as a reminder on how poorly global corporate risk has been impacted by COVID-19. While visibility remains limited on short term prospects, expectations and priorities from management teams may become key as corporates look to preserve their credit rating as the economies lurch into the economic downturn.

The Investment Team remain cautiously constructive but are fully aware of the strong performance over the quarter, the heightened risk of further COVID-19 outbreak and political uncertainty, in particular China and the U.S.

## Fund review

The fund ended the quarter up 4.3% in Sterling terms, making the fund's performance nearly flat year-to-date (-0.4%). At the end of Q1 2020 the fund had a healthy cash balance, higher than usual due to the unprecedented bear market. The Investment Team was active and put some of this cash to work in Q2, in both the primary and secondary markets. Many companies came to market in the last quarter, wanting to raise cash during the downturn, and we participated in various new issue deals, including notes from Siemens AG, Jupiter Fund Management and Reckitt Benckiser. These bonds came at attractive yields and were therefore in high demand, pushing their prices up in the days/weeks following the deal.

Over the last quarter the team have worked to diversify the Sanlam GBP Credit Fund on both a sector and geographical level. In particular, the team have reduced the concentration of UK-centric risk in the portfolio and will continue to diversify the portfolio in the coming months.

As of 30/06/2020:  
 Effective duration – 2.87  
 Yield to Worst (%) – 3.87

## Performance attribution

The fund's top positive and negative contributors to performance in the quarter are listed below:

Positive:

Jerrold 6 ½ 01/15/24, returning 14.32% in Q2, contributing 0.61% to performance

TalkTalk 3 ¾ 02/20/25, returning 8.19% in Q2, contributing 0.45% to performance

Negative:

Provident Financial 7 06/04/23, returning -1.71% in Q2, contributing -0.04% to performance

Kennedy Wilson 3.95 06/30/22, returning -1.68% in Q2, contributing -0.01% to performance

Together (Jerrold) has experienced a strong recovery from the drawdown after taking some preventive actions on its balance sheet. Similarly, TalkTalk has rebounded from the lows in April as part of the market rally over the quarter. Despite sharing encouraging data points on its debt collection business model, Provident Financial has been downgraded by Fitch during the period.

## What to expect

The Sanlam GBP Credit Fund is expecting to move to multi-currency underlying portfolios in the near future. Any currency exposure will be hedged out fully. This presents another opportunity in the form of diversification, as well as a wider investment universe, allowing the team to further reduce UK-centric risk.

An increasing share of Government Bonds are currently negative yielding, thus the Credit Fund offers an attractive investment with a Yield to Worst of 3.87% (as at end of Q2 2020), a short duration and defensive qualities.

The Investment Team are in the process of finalising their ESG Policy and framework. We are committed to generating sustainable and responsible investment returns for our clients, with an emphasis on consistent income generation. ESG analysis will become an integral part of our research process, applying an extra layer of screening to support long term sustainable returns, and thereby improving the average integrity of our portfolio companies.

## Important Information

The Fund may invest in companies based in emerging markets which may involve additional risks not typically associated with other more established markets such as increased risk of social, economic and political uncertainty. The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates.

The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Manager, the Investment Manager or at [www.sanlam.ie](http://www.sanlam.ie).
