

Overview

Aimed at delivering a long-term return of CPI+6%, the Fund invests only in quality businesses exhibiting strong and recurring cashflow to deliver superior risk adjusted returns over time. The team apply the disciplines of value investing to a subset of stocks exhibiting consistently high returns on equity and strong cash generation and are trading below their intrinsic value.

Performance - Past performance is not a guide to future performance

Class B returns are used to illustrate the fund's longest track record and has no fixed management fee. It requires a separate agreement with Sanlam FOUR and is not available to retail clients. Class A is available to retail clients with a 0.75% p.a. management fee, which would result in lower performance than shown. Please see table below for the effect of these charges on performance. **Please see the table overleaf for all available share classes and total fees, or contact us for details.**

The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates. The Fund holds a concentrated portfolio which could mean that it will be volatile when compared to its benchmark.

The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes (CIS) are generally medium to long term investments. A schedule of fees and charges and maximum commissions is available on request free of charge from the Manager, the Investment Manager or at www.sanlam.ie.

Monthly Commentary

Global Markets rose in the low single digits in USD terms, driven by reassuring inflation numbers in the US and Asia, as well as rising oil prices. The oil price rose all the way to \$80, making the energy sector the top performing area of the market.

Conversely political turmoil in Europe led by Italy's struggles in setting up a government sent financial stocks tumbling, with the Europe falling the most. Sentiment was not helped by disappointing inflation and PMI data (reinforcing the ECB's cautious stance), the US withdrawing from the Iran deal and Trump's protectionist rhetoric

Elsewhere, the rise in the USD put significant pressure on EM countries debt which spilled over to the equity markets, sending the LatAm equity indices down sharply.

The Fund underperformed the wider equity market and its CPI target. Despite benefiting tremendously from its absence in Banks and Insurance companies, the Fund was held back by our Media and Healthcare investments. Viacom, WPP, Publicis and AmerisourceBergen were our most notable detractors.

Despite a turnaround plan that is showing some promise, Viacom declined as CBS sued National Amusements in an attempt to block the merger proposed by largest shareholders of both businesses.

AmerisourceBergen was held back by the ongoing rhetoric around the opioid epidemic in the US and the potential governmental action. Its Q2 results while healthy, guidance was at the low end of market expectations on account of manufacturing issues at a production facility, which led to a retrenchment in the share price. These issues are temporary; much more important is the stabilisation of drug pricing which we believe will allow ABC to deliver excellent profit growth in the long term.

Conversely, the Fund saw outstanding performance from a number of portfolio holding. Nasdaq, Medtronic, Microsoft, and Dun&Bradstreet were our most notable contributors.
